

The TOPRA 47th Spring Introductory Course: Introduction to Pharmaceutical Regulatory Affairs 15-17 April 2025 Lincoln Plaza Hotel 2 Lincoln Plaza London E14 9BN

Programme

Learning Outcome:

Extract from the Module Learning Outcomes Module 0 | TOPRA MSc Regulatory Affairs programme

Knowledge Requirements

- Demonstrate a conceptual understanding of the regulatory requirements:
 - EU directives and legislation;
 - Regulatory authorisation and associated documentation for marketing submissions to evaluate current developments critically
- Display a comprehensive understanding of the EU regulatory aspects of drug development
- Possess a systematic understanding of knowledge in and a critical awareness of the regulatory environment and procedures governing regulatory approval of **clinical trials** in the EU and regulatory marketing authorisation in the context of drug development.

Skills and attributes

Successful students will typically:

- Demonstrate the ability to critically analyse the legal documentation and guideline considerations of EU regulatory affairs
- Deal with complex issues both systematically and creatively, make sound judgments in the absence of complete data, and communicate their conclusions clearly to specialist and non-specialist audiences in relation to obtaining regulatory authorisation
- Critically appraise and evaluate communications from regulatory bodies and research publications.

This suggests the following lecture topics MUST cover EU only for

- 1. Legislative framework
- 2. The MAA procedures
- 3. The CTD modules
- 4. Clinical Trials process
- 5. Reg Strategy Development Reg Tools

Case Studies should allow practical application to develop skills and attributes including the interpretation of legislation and critical appraisal of data presented
